Industrial Brush Cutter Attachment

Model:

HD706-EVO

The industrial brush cutter, model HD706-EVO built by DAVCO, is available for machines 31-45 GPM. This brush cutter is designed for hours of low maintenance, easy operation.

The brush cutter attaches to the carrier using an industry standard quick attach mount. All required hydraulic hoses and quick couplers are included for fast, easy connection to the carrier.

Carriers operating with DAVCO brush cutters must be equipped with safety approved shielding as a safety precaution.

At DAVCO Manufacturing we offer a variety of brush cutters to suit most carrier's size and hydraulic requirements.
